Continuation Sheet (PTOL-413)

Application No. 09/911,614

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

The examiner reiterated discussion with his supervisor regarding the Amendment filed September 21, 2003. An information disclosure statement would be required from the applicants if the applicants desire that the prior art discussed in the specification to be considered. In the drawings, in Figure 1a, lead lines should be provided elements 2 and 3 or the reference numerals should be placed on the applicable elements (37 C.F.R. 1.84 (q)). Other drawing figures should be reviewed in the same light, especially Figures 2, 6 and 21. In independent claims 2 and 13, examiner indicated more language is needed to define a gap which exists between a section of the projection portion and the valve seat. In claim 5, line 14, "provided the end plate" should be changed to --provided in the end plate--. With regard to claim 13, it was discussed whether the claimed "spherical portion" was the proper term and if the claimed portion as shown in Figure 2 (element 17a) is really spherical.

Since applicants implemented the changes suggested in the Final Rejection (paper #8), the examiner agreed that the amendment filed September 21, 2003 should be entered and that a subsequent Office Action would be made non-final.
